

Two recent innovations, the emergence of formal cognitive models and the addition of cognitive neuroscience data to the traditional behavioral data, have resulted in the birth of a new, interdisciplinary field of study: model-based cognitive neuroscience. Despite the increasing scientific interest in model-based cognitive neuroscience, few active researchers and even fewer students have a good knowledge of the two constituent disciplines. The main goal of this edited collection is to promote the integration of cognitive modeling and cognitive neuroscience. Experts in the field will provide tutorial-style chapters that explain particular techniques and highlight their usefulness through concrete examples and numerous case studies. The book will also include a thorough list of references pointing the reader towards additional literature and online resources.

Images of the Sign: Semiotic Consciousness in the Novels of Benito Perez Galdos, When the Sun Goes Down: Planning the Funeral of Your Life, It All Makes Sense (Little Bees), Characterisation of Some Immune Genes in the Black Tiger Shrimp, Penaeus Monodon (Comprehensive Summaries of Uppsala Dissertations from the Faculty of Science & Technology), Causes and Coincidences (Cambridge Studies in Philosophy), Perfect Trinity, The Untamed Bears Seek Wife: Paranormal Romance (BBW Paranormal Romance Book 1), Primordial Cosmology (Oxford Graduate Texts), Gendering The City: 1st (First) Edition, Dead Head,

An Introduction to Model-Based Cognitive Neuroscience. Two recent innovations, the emergence of formal cognitive models and the addition of cognitive neuroscience data to the traditional behavioral data, have resulted in the birth of a new, interdisciplinary field of study: model-based cognitive neuroscience.
