

Neuropsycholinguistics - the interaction between linguistics, psycholinguistics, and aphasiology - has, over the past two decades, established itself as a multidisciplinary science worthy of its recent attention in Drs. Nespoulous and Villiards Morphology, Phonology and Aphasia. In this new volume in the Springer Series in Neuropsychology, the editors have most successfully developed a multidisciplinary team of research through the organization of two symposia - one on Morphology and Aphasia, the other focused on Phonology and Aphasia. Toward the goal of better understanding the aphasic patients verbal behavior, the contributing authors of this important work offer their respective expertise, continuing the recent evolution of developments in the fields of morphology and phonology.
