

As a growing number of small businesses are shuttering their doors these days, the idea of opening a business requires something more than a leap of faith. Even under the best of economic conditions, starting a business requires time, money, and lots of energy -- all of which are often poorly spent during a business launch. McCahon's book teaches entrepreneurs how to avoid making these same mistakes. Written as a practical guide in plain English, the book covers three important topics critical to starting (or revamping) a business: How To Quickly Start A Business, How To Write A Fast and Simple Business Plan, and How To Finance A Business -- all topics that are mandatory reading for entrepreneurs during these trying times. McCahon developed the book to help entrepreneurs better understand how to launch a business more efficiently. Using agile business development concepts as a premise for bootstrapping a business, entrepreneurs can test and revise their idea before spending too much time and money on the concept. The book first discusses how to effectively test a business idea. Then, using knowledge gleaned from the testing period, entrepreneurs learn to create a simple business plan. From the financial forecasts developed in the simple business plan, the entrepreneur can then decide if the idea is pursuing. The final section of the book discusses how to prepare for financing and provides 44 ideas on how to fund a business.
